It is herewith confirmed that Naturepower offered by MET Romania Energy SA is compliant with the following key criteria:

- 100% of the electricity comes from renewable energy sources in Romania as defined by Law No. 220/2008 with its subsequent amendments.
- The electricity provided can be traced back to clearly described and identifiable sources.
- MET Romania Energy SA has implemented a reliable and transparent process for accounting the amounts of delivered and purchased quantities of renewable energy.
- No CO₂-emissions result during the generation of electricity.
- An inspection of compliance with the criteria is performed at least once a year.

Through this audit voluntary verification of compliance is provided in accordance with the key criteria stated above. The preconditions for compliance with the conditions stated above are fulfilled for the calendar year 2018.

Validity can be reviewed by entering the test mark ID 43871 at www.certipedia.com.
